

The Arizona Department of Transportation (ADOT) and local/regional partners are hosting a second series of community workshops across the state to present future scenarios to the community for feedback. The scenarios have been developed based on input from the first round of workshops held earlier this year. The community workshops are designed to encourage participation from local communities. Join us to hear information about the process, review work to date, and provide input.

The studies will identify the State's transportation system in the 2030-2050 timeframe.

[Scenario Factsheet](#)
