Disappointed in funding erosion

By: David Martin President Arizona Chapter, , Associated General Contractors Phoenix

To the Editor:

In response to the Arizona Department of Transportation's recent announcement of a payment of \$110 million in Board Funding Obligations to stabilize the state's general fund, Associated General Contractors is disappointed in the latest erosion of funding for transportation projects.

The construction industry in Arizona is one of the hardest hit by the economy. To not pay contractors for work that has already been performed is unacceptable.

This continual raiding of transportation funds, including those by the Legislature, cannot continue.

David Martin,

President, Arizona Chapter,

Associated General Contractors,

Phoenix
